

**FIX YOUR
IDEA OF
PERFECTION.**

IT'S NOT MAGIC. BUT NO ONE NEEDS TO KNOW.

1. SLINGSHOT RTK > HOW TO MAKE AN ENTIRE CLASS OF TECHNOLOGY OBSOLETE.

The Slingshot™ Field Hub delivers precision and power unlike anything you've seen. With an online subscription, the hub lets you tap Slingshot's advanced RTK correction signals, with almost scary accuracy over millions of acres from a single data source. The hub serves up high-speed Internet on your field computers, which gives you access to online services, security and power you just won't find anywhere else.

2. SLINGSHOT ONLINE > COMMAND THE FIELD FROM ANYWHERE IN THE WORLD.

Slingshot's first-ever Internet connectivity delivers online services that will take your operation to a new level of performance. Store your field and application data in a secure online database you can remotely access with a simple Internet connection. Track vehicle locations, make remote changes to work orders like prescription maps in real time and collect data from all your assets with any laptop, desktop or mobile computer anywhere in the world. You just need a web browser. Slingshot Online even connects vehicle operators to Slingshot's support team without ever leaving the cab. Suddenly, downtime and work stoppage are a thing of the past.

3. SLINGSHOT+RAVEN HARDWARE > YOU MIGHT WANT TO CINCH THAT SEATBELT.

Slingshot is an innovation from Raven Applied Technologies, which designs, builds and supports the finest technology in the business right here in North America. From boom controls to application controls, from guidance and steering to field computers, Raven is defining the next chapter of precision ag. Slingshot ignites the full potential of Raven hardware by capturing more data with every pass and delivering it almost instantly to a secure online account.
